

CMS Hospital Inpatient Quality Reporting Program Validation Review for Reconsideration Request

If the Centers for Medicare & Medicaid Services (CMS) determines that a hospital **did not meet** any of the Hospital Inpatient Quality Reporting (IQR) Program requirements due to a confidence interval validation score of less than 75 percent and the hospital would like to request a reconsideration, the hospital **must** complete and submit this form. Additionally, hospitals that need to submit a revised medical record may still do so, but any hospitals that would just be resubmitting a copy that was previously sent to the Clinical Data Abstraction Center (CDAC) Contractor are not required to do so.

Note: CMS limits the scope of data validation reconsideration reviews to information already submitted by the hospital during the initial validation process, and we will not abstract medical records that were not submitted to the CMS contractor during the initial validation process. We will expand the scope of our review only if we find during the review that the hospital correctly and timely submitted the requested medical records.

This form and the entire medical record (if applicable) **must be received** by the Validation Support Contractor **within 30 days** following the date of receipt of the Hospital IQR Program Annual Payment Update (APU) Notification Letter. Medical records and/or additional documentation to support a hospital's rationale may be sent to the "Validation Support Contractor" group via the CMS Managed File Transfer (MFT) application: <https://qnetmft.cms.gov/>. Contact validation@telligen.com for assistance.

Following the receipt of the request form/medical records, an email acknowledgement will be sent confirming the form has been received. Once a determination has been made, CMS will provide the formal decision regarding the reconsideration request.
