Subject: New Performance Report Dashboard is Now Live in HQR

CMS.gov | Hospital Quality Reporting

Announcement from the Centers for Medicare & Medicaid Services (CMS):

Starting today, you can access the new Performance Report dashboard in Hospital Quality Reporting (HQR).

This dashboard allows you to review your data in the way that works best for you. You can do a quick scan and verify that information was submitted, dig into the details and validate your data, or compare your results to state and national benchmarks.

Anything you are used to seeing from your Facility, State, and National (FSN) reports you can now access via the dashboard. You can still export your reports via CSV and PDF.

IQR is the first program available on this dashboard, beginning with FY 2027 submissions. Additional programs will be available in the near future.

Keep an eye out for an informational video about the new dashboard, which will be available soon.
